Crystal Darkness, a shocking, in-depth documentary about the dangers of Crystal Meth, can be seen on April 15, 2008, from 6:30 – 7:00 p.m., on nearly every network-affiliated and independent Arizona television station. The program will air on Spanish language programs an hour and a half earlier from 5:00 – 5:30 p.m.

The program Crystal Darkness is targeted for youths and their parents, and is told through the powerful testimonies of young people who have gone through the dark and lonely depths of Meth addiction.

While the documentary airs, hundreds of professionally trained volunteers will be standing by to receive and refer phone calls from families and victims seeking help against this horrible drug. The documentary not only aims to help victims of Crystal Meth, but to create awareness of the deadly effects of the drug amongst the state's youth and discourage its use.

Crystal Meth destroys lives and creates an environment that will not allow students' to learn and thrive in a productive manner.
